

WhatsApp Support Gateway - Concise Video Script

Teleprompter cue cards formatted for easy reading on your phone while recording on laptop.

RECORDING SETUP:

- Run: `uv run uvicorn gateway.main:app --host 0.0.0.0 --port 8000 --reload`
- Open: `http://localhost:8000/demo` (100% zoom, both panes visible)
- Screen Record: Press **Print Screen** key (or use Loom / OBS)

STEP 0: INTRO & ARCHITECTURE

■ ACTION:

Hover mouse over WhatsApp phone on left, then live telemetry on right.

■ ON SCREEN:

Browser at `localhost:8000/demo` showing phone simulator & telemetry console.

■ SPOKEN SCRIPT (SAY THIS):

"Welcome to our WhatsApp Support Gateway demo. Built with Python and FastAPI, this system delivers sub-30ms webhook acknowledgment, secure database tool calling, and seamless live human takeover."

STEP 1: ORDER TRACKING (SUB-30MS & READ RECEIPTS)

■ ACTION:

Click chip: 1. Track #ORD-1001

■ ON SCREEN:

3 green typing dots appear, double ticks turn blue (read receipt), latency <20ms, FedEx details returned.

■ SPOKEN SCRIPT (SAY THIS):

"First, tracking an order: the webhook responds in under 20 milliseconds, marks the message as read with WhatsApp blue checkmarks, shows typing dots, and retrieves live FedEx status."

STEP 2: CONTEXT MEMORY & RETURN POLICY

■ ACTION:

Click chip: 2. Can I return it?

■ ON SCREEN:

Bot resolves 'it' to #ORD-1001 and rejects return because shipment is in transit.

■ SPOKEN SCRIPT (SAY THIS):

"Notice conversational context: asking 'Can I return it?' resolves 'it' to our active order. Because the package is still in transit, the bot strictly enforces return policy and explains returns require delivery first."

STEP 3: ANTI-IDOR SECURITY CHALLENGE

■ **ACTION:**

Click chip: 3. Track #ORD-1002 (Security Check)

■ **ON SCREEN:**

Bot intercepts query for #ORD-1002 (belongs to another phone), blocks details, and asks for last 4 digits.

■ ■ **SPOKEN SCRIPT (SAY THIS):**

"For privacy, if a customer queries someone else's order, our Anti-IDOR layer intercepts, blocks details, and demands the last 4 digits on file."

STEP 4: OWNERSHIP AUTHENTICATION

■ **ACTION:**

Click chip: 4. Verify: 6543

■ **ON SCREEN:**

Bot confirms 'Security Verification Successful!' and unlocks #ORD-1002 status.

■ ■ **SPOKEN SCRIPT (SAY THIS):**

"Entering the 4 digits validates ownership, unlocks the session, and presents the order status."

STEP 5: DELIVERED ORDER RETURN REQUEST

■ **ACTION:**

Click chip: 5. Return #ORD-1003

■ **ON SCREEN:**

Bot detects delivered order #ORD-1003 belongs to another account and requests 4-digit verification.

■ ■ **SPOKEN SCRIPT (SAY THIS):**

"Now requesting a return on a delivered order: the gateway validates eligibility before authorizing return shipping."

STEP 6: PROGRAMMATIC PDF RETURN LABEL & BARCODE

■ **ACTION:**

Click chip: 6. Verify: 2233 (Get PDF)

Then click the PDF Document Card in phone.

■ **ON SCREEN:**

Bot approves return and delivers document card. Clicking opens vector PDF in new tab with Code128 barcode.

■ ■ **SPOKEN SCRIPT (SAY THIS):**

"Once verified, the gateway programmatically generates a vector PDF return shipping label using ReportLab, complete with prepaid routing, a Code128 barcode, and an RMA packing slip."

STEP 7: SHOPIFY API INTEGRATION

■ ACTION:

(Switch back to demo tab) Click chip: 7. Shopify #1001

■ ON SCREEN:

Telemetry shows routing via ShopifyOrderAdapter. Bot returns live line items and fulfillment status.

■■ SPOKEN SCRIPT (SAY THIS):

"Using clean ports and adapters, a single config flag switches from local storage to a live Shopify Admin REST API, seamlessly parsing live line items and fulfillment stages."

STEP 8: HUMAN ESCALATION & STRICT BOT MUTING

■ ACTION:

Click chip: 8. Talk to Human

■ ON SCREEN:

Session State turns amber **ESCALATED_HUMAN**. External webhook fires. Operator Desk opens live WebSocket bridge.

■■ SPOKEN SCRIPT (SAY THIS):

"When a customer requests human help, an external webhook fires to Zendesk or n8n, strict bot muting engages, and our Operator Station opens a live WebSocket bridge."

STEP 9: BOT MUTING VERIFICATION (ZERO SPAM)

■ ACTION:

In phone chat input, type: Where is my refund? and send.

■ ON SCREEN:

Message appears on phone. **Bot stays silent**. Message appears live in Operator Chat Feed on right.

■■ SPOKEN SCRIPT (SAY THIS):

"Customer follow-ups never trigger automated spam—the bot stays completely silent, while the customer's message streams live to our operator desk."

STEP 10: REAL-TIME 2-WAY OPERATOR CHAT

■ ACTION:

In Operator Desk, type: Hi, Agent Sarah here! Your refund of \$189.50 has been released. and click Send as Agent.

■ ON SCREEN:

Message appears immediately on customer phone with blue ■ Agent Sarah badge.

■■ SPOKEN SCRIPT (SAY THIS):

"As the human agent, typing a reply dispatches directly to the customer's WhatsApp in real time and logs to the permanent transcript."

STEP 11: SESSION RESOLUTION

■ ACTION:

Click button: Unmute Bot / Resolve

■ ON SCREEN:

Operator Station closes. Session State returns to green **ACTIVE_BOT**.

■ SPOKEN SCRIPT (SAY THIS):

"Once resolved, clicking 'Unmute Bot' re-enables automated bot handling for future inquiries."

STEP 12: PRODUCTION RIGOR & 94 TESTS

■ ACTION:

Switch to Terminal window and run: `uv run pytest`

■ ON SCREEN:

All **94 tests** pass green in under 1.5 seconds.

■ SPOKEN SCRIPT (SAY THIS):

"Under the hood, the system is backed by Docker Compose, Redis Streams for horizontal scaling, strict mypy typing, and 94 automated tests passing in under 1.5 seconds."

Master Quick-Reference Cheat Sheet (All-In-One Table)

What to Click / Type	What Happens on Screen	What to Say in Video
Hover mouse over WhatsApp phone on left, then live telemetry on right.	Browser at localhost:8000/demo showing phone simulator & telemetry console.	"Welcome to our WhatsApp Support Gateway demo. Built with Python and FastAPI, this system delivers sub-30ms webhook acknowledgment, secure database tool calling, and seamless live human takeover."
Click chip: 1. Track #ORD-1001	3 green typing dots appear, double ticks turn blue (read receipt), latency <20ms, FedEx details returned.	"First, tracking an order: the webhook responds in under 20 milliseconds, marks the message as read with WhatsApp blue checkmarks, shows typing dots, and retrieves live FedEx status."
Click chip: 2. Can I return it?	Bot resolves 'it' to #ORD-1001 and rejects return because shipment is in transit.	"Notice conversational context: asking 'Can I return it?' resolves 'it' to our active order. Because the package is still in transit, the bot strictly enforces return policy and explains returns require delivery first."
Click chip: 3. Track #ORD-1002 (Security Check)	Bot intercepts query for #ORD-1002 (belongs to another phone), blocks details, and asks for last 4 digits.	"For privacy, if a customer queries someone else's order, our Anti-IDOR layer intercepts, blocks details, and demands the last 4 digits on file."
Click chip: 4. Verify: 6543	Bot confirms 'Security Verification Successful!' and unlocks #ORD-1002 status.	"Entering the 4 digits validates ownership, unlocks the session, and presents the order status."
Click chip: 5. Return #ORD-1003	Bot detects delivered order #ORD-1003 belongs to another account and requests 4-digit verification.	"Now requesting a return on a delivered order: the gateway validates eligibility before authorizing return shipping."
Click chip: 6. Verify: 2233 (Get PDF) Then click the PDF Document Card in phone.	Bot approves return and delivers document card. Clicking opens vector PDF in new tab with Code128 barcode.	"Once verified, the gateway programmatically generates a vector PDF return shipping label using ReportLab, complete with prepaid routing, a Code128 barcode, and an RMA packing slip."
(Switch back to demo tab) Click chip: 7. Shopify #1001	Telemetry shows routing via ShopifyOrderAdapter. Bot returns live line items and fulfillment status.	"Using clean ports and adapters, a single config flag switches from local storage to a live Shopify Admin REST API, seamlessly parsing live line items and fulfillment stages."
Click chip: 8. Talk to Human	Session State turns amber ESCALATED_HUMAN . External webhook fires. Operator Desk opens live WebSocket bridge.	"When a customer requests human help, an external webhook fires to Zendesk or n8n, strict bot muting engages, and our Operator Station opens a live WebSocket bridge."
In phone chat input, type: Where is my refund? and send.	Message appears on phone. Bot stays silent . Message appears live in Operator Chat Feed on right.	"Customer follow-ups never trigger automated spam—the bot stays completely silent, while the customer's message streams live to our operator desk."
In Operator Desk, type: Hi, Agent Sarah here! Your refund of \$189.50 has been released. and click Send as Agent.	Message appears immediately on customer phone with blue  Agent Sarah badge.	"As the human agent, typing a reply dispatches directly to the customer's WhatsApp in real time and logs to the permanent transcript."
Click button: Unmute Bot / Resolve	Operator Station closes. Session State returns to green ACTIVE_BOT .	"Once resolved, clicking 'Unmute Bot' re-enables automated bot handling for future inquiries."
Switch to Terminal window and run: uv run pytest	All 94 tests pass green in under 1.5 seconds.	"Under the hood, the system is backed by Docker Compose, Redis Streams for horizontal scaling, strict mypy typing, and 94 automated tests passing in under 1.5 seconds."
